

HM 26C Hand Mike

This is a great light weight mic for a step on guide / narrator or for Karaoke Tours offering fantastic sound quality and comes with a 15' mic cable. You can connect to either the front or rear mic sockets on the PA 64. You can even run two mics at the same time with no loss of sound.

Same as the HM 3C, but designed specifically for the PA 63, PA 64, JB 6 and MB 6 and automatically eliminates the on/off mic pop. It will not function with the PA 5 Series systems.
