

HS 46 Right Side Headset

Same as our HS 40M, but designed specifically for the PA 63, PA 64, JB 6, MB 6 and eliminates the slight on/off mic pop. It too includes an inline On/Off switch so you can have a private conversation and the switch will trigger the muting function when playing music.

With its durable yet comfortable metal behind the head headband, it will fit any sized bean and you can still wear a hat. Just bend the band to fit... go ahead, it's tough.
