

JB 6 - Portable PA System with BT Input

So you need a PA to save your voice, but you don't want to install anything? No problem!

The JB 6 is a stand-alone PA speaker system with a built in 2 x 32 Watt amplifier, internal BT receiver, so you can play music directly from your phone and it comes with a second Buddy Speaker so even the people in the back can hear properly. You can use any of our microphone designs from hand mic (HM 36 or PHM 6C) to headset (HS 36 or HS 46), even our wireless (Hs BT4 and HM BT3).

Plug it into power and the JB 6 is ready to go in seconds, but we ask everyone to use the included mounting brackets to keep everyone safe... just in case of an accident.
