## Owner's/Installation Manual

Universal Public Address System

ASA ELECTRONICS  
2602 Marina Drive  
Elkhart, IN 46514  
877-305-0445  
[www.asaelectronics.com](http://www.asaelectronics.com)

The lightning flash with the arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

## Description:

The JENSEN JPA600 is a universal public address system that can be utilized as a stand alone PA(when connected to speakers) or operate in conjunction with any existing radio/speaker set up.

## Operation:

The JPA600 system amplifier connects in line between the vehicle's radio and the installed speakers.

The installed radio will operate normally. When the microphone is activated by the "Push to Talk"(PTT) switch on the microphone, the speakers are electrically disconnected from the radio and engaged with the PA.

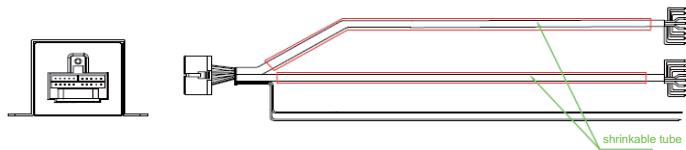

The microphone triggers activation of the PA through the same speakers(muting/overriding the radio source).

## Hardware Package :

Screws	A small icon of a Phillips-head screw.	4
--------	--	---

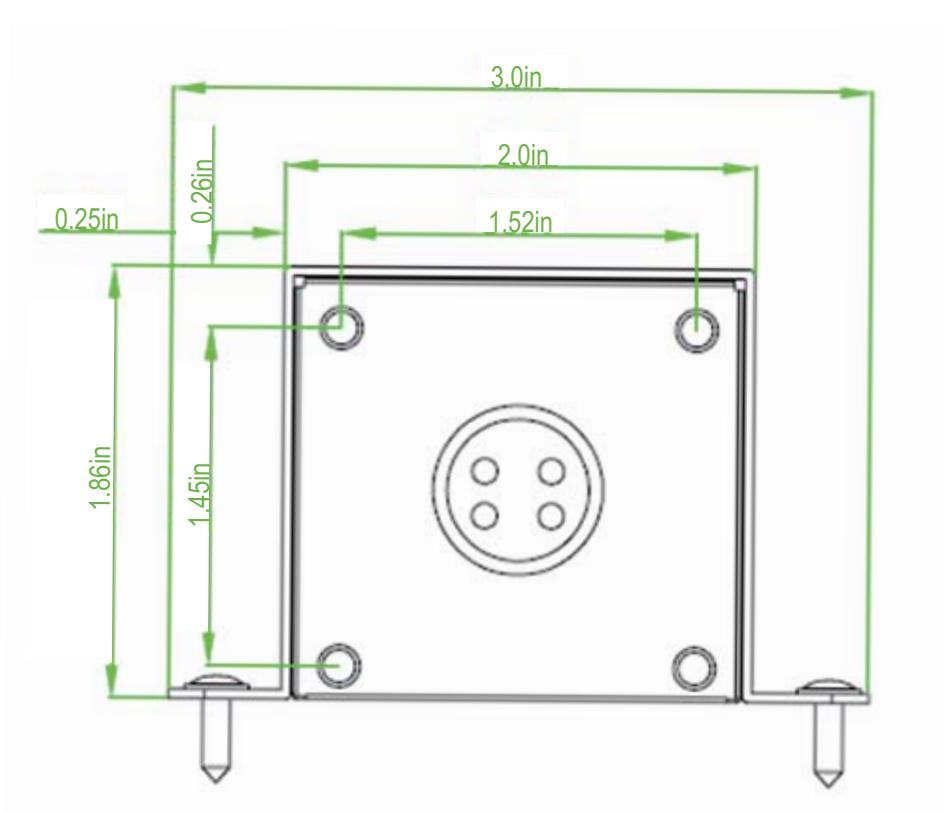

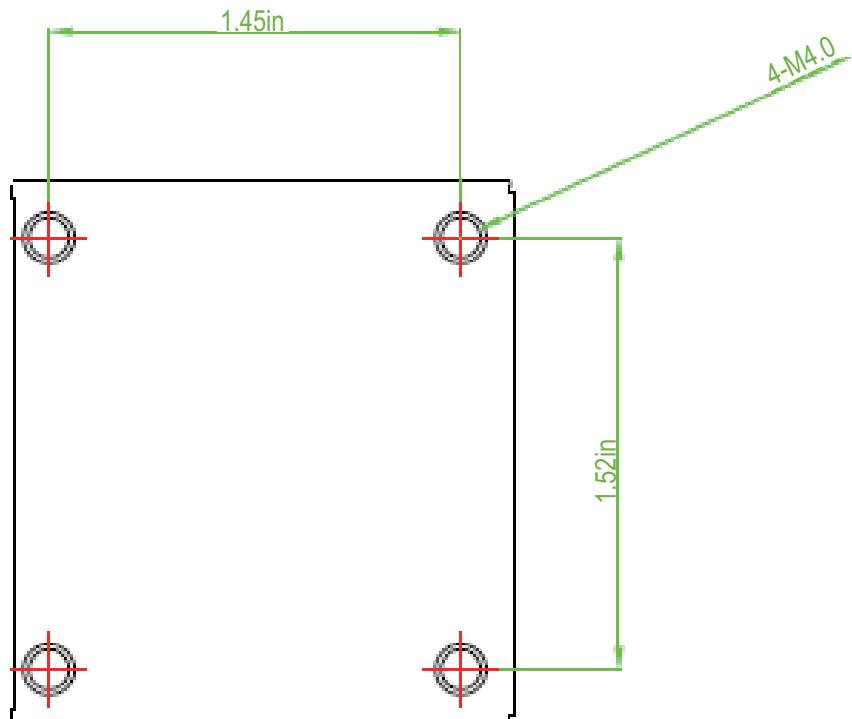

Washers	A small icon of a flat circular washer.	4
---------	---	---

Manual	An icon of the manual cover, which features the Jensen logo and the text 'JPA600 Owner's/Installation Manual'.	1
--------	--	---

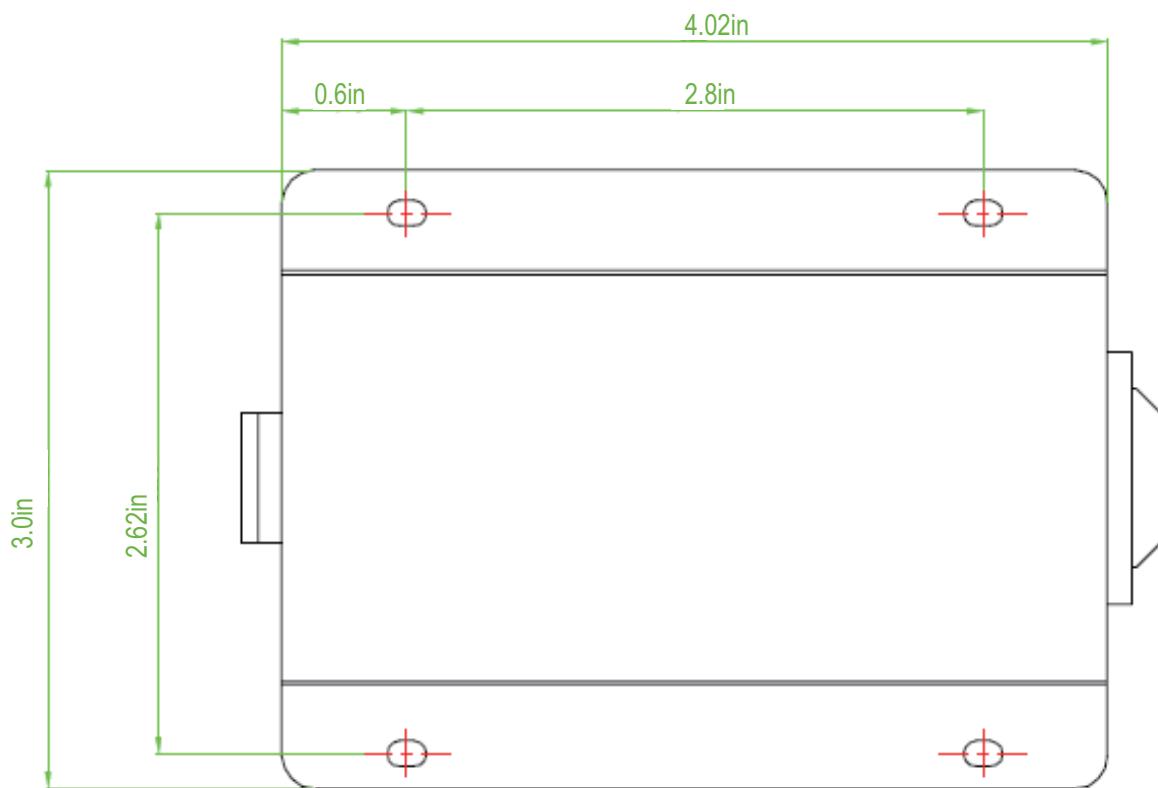

# Panel Cutout (Optional Installation):

The JPA600 may also be mounted through a panel(as shown below).

# Optional Flange Mount Installation:

The JPA600 may also be mounted in a “blind” location, using the mounting holes on the flanges.

# Typical Wiring Connections:

## INPUT NOTES:

Wire Radio according to  
Manufacturer Spec.

JPA600 can accept any  
radio (up to 4 Channels).

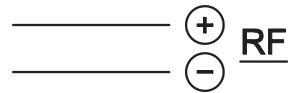

Maintain appropriate load  
requirements.  
(4 ohm minimum suggested)

Align Speakers with "+" on top and "-" on bottom

# Troubleshooting:

Symptom	Possible Cause	Possible Solution
Has audio from radio but not JPA600	- In-line fuse blown - Inout and output wired backwards	- Check and replace in-line fuse - Reverse input and output wiring
High pitched squeal (feed back)  Hand held MIC keyed and gets feed back	- Volume on MIC set too high	- Turn volume down on MIC
JPA600 will not turn on, (does not have power)	- In-line fuse on PA blown	- Replace fuse

# Specifications:

4 Channels	25 Watts per channel, 4 ohm load
Current Draw	10 Amp Max.
Frequency Response	100-10,000
Size	3.0"x1.85"x4.0"(W x H x D)
Weight	11.12 oz.

## Installation et manuel utilisateur

**Système de sonorisation universel**

ASA ELECTRONICS  
2602 Marina Drive  
Elkhart, IN 46514  
877-305-0445  
[www.asaelectronics.com](http://www.asaelectronics.com)

L'éclair terminé par une flèche dans un triangle équilatéral est un symbole destiné à alerter l'utilisateur de la présence d'une « tension dangereuse » non isolée à l'intérieur du boîtier du produit qui peut être suffisamment importante pour constituer un risque d'électrocution.

Le point d'exclamation dans un triangle équilatéral est un symbole destiné à attirer l'attention de l'utilisateur sur des instructions importantes de fonctionnement et d'entretien (réparation) dans ce manuel d'instructions.

## Description :

LE JPA600 JENSEN est un système de sonorisation universel qui peut être utilisé de manière autonome (quand connecté à des haut-parleurs) ou avec tout ensemble radio/haut-parleurs existant.

## Opération :

Le système d'amplification JPA600 se connecte entre la radio du véhicule et les haut-parleurs installés.

La radio installée fonctionnera normalement. Quand un microphone est activé par le bouton « Push to Talk » (PTT) sur le microphone, les haut-parleurs sont électriquement déconnectés de la radio et sont reliés au PA.

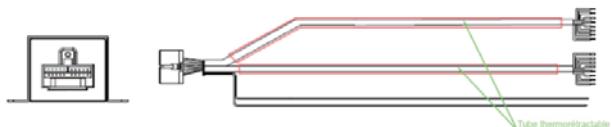

Le microphone déclenche l'activation du PA par les mêmes haut-parleurs (en mettant en muet/en ignorant la source radio).

## Manual de Instalación/del Propietario

**Sistema Universal de Megafonía**

ASA ELECTRONICS  
2602 Marina Drive  
Elkhart, IN 46514  
877-305-0445  
[www.asaelectronics.com](http://www.asaelectronics.com)

El relámpago con el símbolo de punta de flecha dentro de un triángulo equilátero está destinado a alertar al usuario de la presencia de “voltaje peligroso” sin aislamiento dentro de la carcasa del producto, que puede ser de la magnitud suficiente para provocar una descarga eléctrica a una persona.

La señal de exclamación dentro de un triángulo equilátero está destinada a alertar al usuario de la presencia de instrucciones importantes de operación y mantenimiento (reparación) en la documentación que acompaña al dispositivo.

## Descripción:

El JENSEN JPA600 es un sistema universal de megafonía que puede ser utilizado como megafonía independiente (conectado a altavoces) o integrarse en cualquier configuración previa de radio/altavoces.

## Operación:

El amplificador del sistema JPA600 se conecta en línea entre la radio del vehículo y los altavoces instalados.

La radio instalada funcionará con normalidad. Al activar el micrófono mediante el interruptor PTT (“Push to Talk”, o “Presionar para hablar”) del micrófono, los altavoces se desconectarán eléctricamente de la radio y se conectarán al sistema de megafonía.

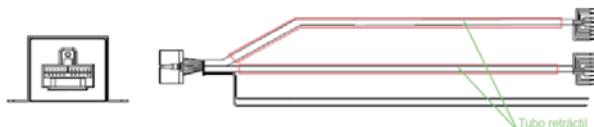

El micrófono desencadena la activación del sistema a través de los altavoces (silenciado/anulación de la fuente de radio).

## Troquelado del panel (Instalación opcional):

El JPA600 también se puede montar a través de un panel (como se muestra más abajo).

# Instalación opcional con montaje de brida:

El JPA600 también se puede montar en una ubicación “ciega”, utilizando los orificios de montaje que hay en las bridas.

# Conexiones típicas de cableado:

## NOTAS DE ENTRADA:

Conecte los cables de la radio según las especificaciones del fabricante.

El sistema JPA600 es compatible con cualquier radio (de hasta 4 canales).

Respete los requisitos adecuados de carga (recomendamos 4 ohmios mínimo).

Alinee los altavoces con el "+" arriba y el "-" abajo, según se muestra

# Resolución de problemas:

Síntoma	Possible causa	Possible solución
Se oye la radio, pero no el JPA600	- Fusible de entrada fundido - Se han invertido los cables de entrada y salida	- Compruebe y sustituya el fusible de entrada - Corrija la conexión del cableado de entrada y salida
Chirrido agudo (retroalimentación)  El micrófono portátil se acopla y emite un chirrido	- El volumen del micro es excesivo	- Baje el volumen del micro
El JPA600 no se enciende (no tiene alimentación)	- Fusible de entrada en el sistema de megafonía fundido	- Sustituya el fusible

# Especificaciones técnicas:

4 canales	25 W por canal, carga de 4 Oh
Consumo de corriente	Máx. 10 A
Respuesta de frecuencia	100-10.000
Dimensiones	3,0"x1,85"x4,0" (An x Al x L)
Peso	11,12 oz.
